Section I. Plenary overviews

A perspective of eV–MeV ion beams
Takagi, T. 1
Current status of ion implantation for VLSI applications
Akasaka, Y. 9
Ion beam deposition in materials research
Zuhr, R.A., S.J. Pennycook, T.S. Noggle, N. Herbots, T.E. Haynes and B.R. Appleton 16
Advanced ion beam equipment used for semiconductor production
Rose, P.H. 22

Section II. Ion sources

Volume production of hydrogen negative ions
Bacal, M. 28
Development of high current and high brightness negative hydrogen ion sources
Leung, K.N. 33
A heavy negative ion sputter source: production mechanism of negative ions and their applications
Ishikawa, J. 38
The sputter generation of negative ion beams
Alton, G.D. 45
Sources of polarized ions and atoms
Cornelius, W.D. 56
New results from the KEK ion source development projects
Mori, Y., A. Takagi, K. Ikegami, A. Ueno and S. Fukumoto 63
Advances in metal ion sources
Brown, I.G. 68
Metal beam production using a high current ion source
Keller, R., B.R. Nielsen and B. Torp 74
Ion sources for use in ion implantation
White, N.R. 78
New microwave ion source for high energy ion implanter
Amemiya, K., K. Tokiguchi, H. Koike, T. Seki and N. Sakudo 87
Enhanced ionization Freeman ion source
Sampayan, S.E., M.L. King, L.E. Frisa, R.A. Moore and J.P. Dykstra 90
HIMAC PIG ion source development
Yamada, T., Y. Sato, H. Ogawa and T. Kimura 94
Thirty-eight-centimeter ion source
Kaufman, H.R., W.E. Hughes, R.S. Robinson and G.R. Thompson 98
Development and use of a large area ultralow energy reactive ion beam
Proudfoot, G., C.M.O. Mahony and R. Perrin 103

0168-583X/89/$03.50 © Elsevier Science Publishers B.V.
(North-Holland Physics Publishing Division)

Extraction of intense plasma beams of metal ions from a magnetized coaxial diode operated in vacuum-arc mode
Ikehata, T., H. Mase and T. Tanabe 107

Multi-ampere negative hydrogen ion source for fusion application
Inoue, T., M. Araki, M. Hanada, T. Kurashima, S. Matsuda, Y. Matsuda, Y. Ohara, Y. Okumura, S. Tanaka and K. Watanabe 111

The oxidation technique for efficient ionization of lanthanides by a helium-jet loaded on-line isotope separator
Kawase, Y. and K. Okano 116

Superdense hollow cathode glow discharge and its application to ion sources
Mase, H., T. Tanabe and T. Ikehata 120

Generation of pure gallium ion beams by field ionization of laser-excited Rydberg atoms
Oomori, T., K. Ono and Y. Murai 124

Production of high current ion beams of various gas species from a magnetic multipole ion source
Tanaka, S., M. Akiba, M. Araki, S. Matsuda, Y. Matsuda, Y. Ohara, Y. Okumura, K. Yokoyama and K. Watanabe 128

Production of negative lithium ions from the surface immersed in magnetic-field-free plasmas
Wada, M., H. Tsuda and M. Sasao 132

A reaction sputtering type rf ion source for solid elements
Cheng Shichang, Fu Dejun, Zhang Hui and Pan Xianzheng 136

Long life plasma filament type ion source
Fukui, R., K. Takagi, T. Tsugueda, H. Tsuboi, R. Kikuchi, E. Yabe and K. Takayama 140

Bucket type ion source using a microwave plasma cathode
Hakamata, Y., T. Iga, K. Natsui and T. Sato 143

Fundamental study of ECR multicharged ion sources
Ishii, S., H. Oyama and H. Odagiri 147

Direct deposition of focused ion beams with an impregnated-electrode-type liquid metal ion source
Ishikawa, J., H. Tsuji, T. Kashiwagi, Y. Aoyama and T. Takagi 151

Intense metal ion beam formation by an impregnated-electrode-type liquid metal ion source
Ishikawa, J., H. Tsuji, T. Kashiwagi and T. Takagi 155

Slit extraction type compact microwave ion source
Tsuji, H., J. Ishikawa and T. Takagi 159

Development of a low energy ion source with multicapillary anode
Ogawa, S., A. Okamoto, K. Takiguchi, M. Yoshitake, T. Nosaka, S. Fukui and T. Ueno 163

Ion source with plasma cathode for ion assisted deposition
Shiono, T., T. Shibuya, Y. Harano, E. Yabe and K. Takayama 166

A high current sheet plasma ion source
Takagi, K., T. Tsugueda, R. Fukui, H. Tsuboi, T. Katagawa, H. Yamakawa, A. Hoshino, Y. Agawa, R. Kikuchi and K. Takayama 169

Compact ECR ion source
Tamba, M., K. Yamaguchi, S. Tanaka, M. Yamawaki, M. Nakajima and Y. Sakamoto 173

Enhancement of H^- production in a multicusp source by proper selection of wall material
Fukumasa, O., S. Saeki and S. Shiratake 176

Mass spectra of Au–Ge alloy liquid metal ion sources
Machalett, F., R. Mühle, I. Stiebritz and G. Götz 180

Emittances of a microwave ion source for implantation
Sakudo, N., H. Koike, K. Tokiguchi, T. Seki and K. Sakai 184

Analysis of magnetron ion sources and PIG ion sources
Tanizuka, N. 189

The effect of a magnetic field on the plasma characteristics of a sputter-type hf ion source
Yamashita, M. 194

Development of high current metal ion beam source
Inami, H., F. Fukumaru, Y. Inouchi, D. Sato, K. Tanaka and K. Matsunaga 198

Hollow cathode ion source developed for metal ions
Kogure, S., A. Tonegawa, K. Takayama, R. Fukui and K. Takagi 201

Negative ion source for the tandem accelerator
Nishihashi, T., H. Tsuboi, Y. Mihara, Y. Agawa, T. Uchiyama, N. Ueda, T. Katagawa, K. Takagi, H. Yamakawa, R. Kikuchi and A. Isoya 205

Development of an arsenic liquid-metal ion source
Umemura, K., Y. Kawanami and T. Ishitani 208

Section III. Ion beam transport

Development of focused ion beam systems
Aihara, R., H. Sawaragi, B. Thompson and M.H. Shearer 212

Focused ion beam technologies for lithographic applications
Kato, T. 218

Focused ion beam repair of lithographic masks
Wagner, A. and J.P. Levin 224

Electron detachment cross-sections for heavy negative-ion beam
Tsuji, H., J. Ishikawa, T. Maekawa and T. Takagi 231

Design study of high energy, high current rf accelerators for ion implantation
Thomae, R.W., H. Deitinghoff, J. Häuser, H. Klein, P. Leipe, A. Schempp, T. Weis, J. Bannenberg, W. Urbanus, R. Wojke and P.W. Van Amersfoort 235

Focused ion beam system with a four stage $E \times B$ mass filter
Kawanami, Y., T. Ishitani and K. Umemura 240

Influence of excitation current deviation of a quadrupole magnet on beam spot size for MeV microbeams
Takai, M., A. Kinomura, T. Matsuo, S. Namba, M. Satou, M. Kiuchi and K. Fujii 244

An RFQ accelerator system for MeV ion implantation
Hirakimoto, A., H. Nakanishi, H. Fujita, I. Konishi, S. Nagamachi, H. Nakahara and M. Asari . 248

Ion beam acceleration using variable frequency RFQ
Tokiguchi, K., K. Amemiya, H. Koike, T. Seki, N. Sakudo, S. Yamada and Y. Hirao 253

Influence of plasma parameters on ion transport directionality in a glow discharge sheath
Tagami, T. and S. Tanaka 256

Microbeamline design for medium to high energy helium ion beams
Takai, M., T. Matsuo, S. Namba, K. Inoue, K. Ishibashi and Y. Kawata 260

Section IV. Ion implantation and ion beam interactions with solids

Recent developments in low-energy ion scattering spectroscopy (ISS) for surface structural analysis
Aono, M., M. Katayama, E. Nomura, T. Chassé, D. Choi and M. Kato 264

Ion beam induced chemical changes in molecular solids
Brown, W.L. 270

Comparative status of pulsed ion implantation
Gyulai, J. and I. Krafcsik 275

Solid phase epitaxial processes in implant-amorphized semiconductors
Sigmon, T.W. and M.A. Parker 280

Gate-edge effects on SPE regrowth from As^+-implanted Si
Horiuchi, M., M. Tamura and S. Aoki 285

Optimisation of SIMOX structures formed by ion beam synthesis
Reeson, K.J., K.G. Stephens and P.L.F. Hemment 290

Gold implantation in silicon: diffusion studies and device applications
Coffa, S., L. Calcagno, G. Calleri, G. Ferla and S.U. Campisano 296

Modification of a 100-mA-class high-current oxygen implanter and its application to ultrathin film MOSFET/SIMOX
Izumi, K., Y. Omura and S. Nakashima 299

Nondestructive assessment of SIMOX substrates
Steigmeier, E.F., G. Harbeke, K.J. Reeson, P.L.F. Hemment and A.K. Robinson 304
Substitutional site control of Si in GaAs by stoichiometry change with Ga ion implantation
Nakamura, K. and T. Nozaki 308
Two-dimensional simulation of ion implantation profiles using a personal computer
Barthel, A., J. Lorenz and H. Ryssel 312
Depth profiles of secondary defects of As^+ and BF_2^+ implanted silicon measured by a thermal wave technique
Ishikawa, K., M. Yoshida and M. Inoue 317
Deep levels in indium phosphide implanted with argon and phosphorus
Kimura, T., M. Kuwata, Luo Ji-Kui, S. Yugo and Y. Adachi 321
Surface roughness and sputtering yield of heavily ion implanted surfaces
Nunogaki, M., M. Uchida, Y. Kuratomi and K. Miyazaki 325
Mask-size dependence of lattice defects generated by B- and As-implantation into submicron Si areas
Tamura, M., M. Horiuchi and Y. Kawamoto 329
SiF_n-implanted GaAs and shallow junctions
Zhao Qihua, Jiang Xinyuan, Lin Chenglu, Fan Weidong, Wang Weiyuan and Liu Xianghuai ... 336
A photoluminescence method of mapping dose uniformity in GaAs substrates
Powell, R.A., S.B. Felch, D. Kirillov and A. Bivas 339
Channeling control in silicon ⟨111⟩ substrates by target orientation
Simonton, R. and D. Kamenitsa 344
Electron-beam doping of Si into GaAs: the annealing behaviour of photoluminescence
Wada, T. and A. Takeda 348
Electron beam doping of Si into GaAs in the overlayer Si/substrate GaAs and the sandwiched system of GaAs/Si/GaAs
Wada, T. and A. Takeda 352
Channeled implantation with a parallel scanned ion beam
Westendorp, J.F.M., R.E. Kaim, G.B. Odlum, R. Schreutelkamp, F.W. Saris and K.T.F. Janssen 357
Sheet resistance uniformity monitoring of a medium-current ion implanter
Zrudsky, D.R. and R.B. Simonton 361
Transient diffusion of boron implanted in Si along random and channeling directions
Chu, W.K., M.Z. Numan, J.Z. Zhang, G.S. Sandhu and A.E. Michel 365
The role of transient damage annealing in shallow junction formation
Farr, R.B. 371
Anomalous transient diffusion of ion implanted dopants: a phenomenological model
Michel, A.E. 379
A study of molecular arsenic ion implantation in silicon
Lin Chenglu, Fang Ziwei, Zhou Wei, Ni Rushan and Zou Shichang 384
Epitaxial crystallisation of tin implanted silicon
Thornton, R.P., R.G. Elliman and J.S. Williams 387
Behavior of hydrogen during laser crystallization and RTA of a-Si:H SOI
Bao, X.-M., Q. Gu and X.-F. Huang 391
Dependence of transient enhanced diffusion on defect depth position in ion implanted silicon
Solmi, S., F. Cembali, R. Fabbri, R. Lotti, M. Servidori, M. Anderle and R. Canteri 394
High energy implantation: present and future facilities
Bannenberg, J.G. and F.W. Saris 398
Present developments of research MeV Pelletron ion implantation systems
Norton, G.A., R.E. Daniel, R.L. Loger and J.B. Schroeder 403
On the temperature dependence and the moving species during ion mixing
Xia, W., M. Fernandes, C.A. Hewett, S.S. Lau, D.B. Poker and J.P. Biersack 408

Thermal and ion induced silicide formation
Hung, L.S., Q.Z. Hong and J.W. Mayer 414
Metastable phase and dendritic pattern formation in thin solid films by ion mixing
Shang, C.H. and B.X. Liu 420
Dynamic implantation model of ion beam enhanced deposition
Yang Genqing, Jiang Binyao, Zhou Wei, Liu Xianghuai and Zou Shichang 424
Physical and electrical properties of oxides grown on carbon-implanted silicon
Arnold, G.W., W.K. Schubert, C.H. Seager, M.J. Carr, G.C. Nelson and B.L. Doyle 429
Formation and characterization of carbon layers deposited during ion bombardment of silicon
Braun, M., H. Khosroupour, E. Johansson and S. Hogmark 434
Mössbauer spectroscopy study of the thermal annealing behavior of very low and very high dose Co-implanted Si
Langouche, G., M. De Potter, I. Dézsi, M.F. Wu and A. Vantomme 438

Section V. New implantation equipment and system techniques

Performance of the Applied Materials PI9000 series ion implantation systems
Wauk, M.T. and A.D. Giles 442
New development in ion implantation and RTP equipment for high productivity
McKenna, C.M. 448
High current implantation equipment
Matsuda, K., T. Kawai and M. Naito 456
New method of solid state wafer cooling in the Extrion 1000 high current ion implantation system
Mears, E., E. Evans, K. Pierce and R. Liebert 460
Dose control system for the Extrion 1000 ion implantation system
Liebert, R.B., S. Satoh, A. Delforge and E. Evans 464
Beam scanning system for large tilt angle ion implantation
Sasaki, M., M. Tanaka, H. Kawakami and H. Kumazaki 469
Charging and charge neutralization in ion implantation
Mack, M.E. 472
Performance characteristics of the Genus Inc. IX-1500 high energy ion implantation system
O'Connor, J.P., N. Tokoro, J. Smith and M. Sieradzki 478
Particle contamination in implanters
Smith, T.C. 486
Wafer charging control in the 160 XP high current implanter
McKenna, C.M., B.O. Pedersen, J.K. Lee, R.F. Outcault and S. Kikuchi 492
The VP 7-200 batch-processing wafer handler
Rathmell, R.D., J.E. Raatz, B.L. Becker, R.L. Kitchen, T.R. Luck and J.H. Decker 497
The ASM-220 medium current implanter
Berrian, D.W., R.E. Kaim, J.W. Vanderpot and J.F.M. Westendorp 500
A versatile ion implanter for material modification
Öchsner, R., A. Kluge and H. Ryssel 504
MEQALAC: a 1-MeV multichannel rf-accelerator for light ions
Urbanus, W.H., R.G.C. Wojke, J.G. Bannenberg, H. Klein, A. Schempp, R.W. Thomae, T. Weis and P.W. Van Amersfoort 508
SIMOX: buried layer formation by ion implantation – equipment and techniques
Wittkower, A.B. and M.A. Guerra 512
In situ uniformity control, dose monitoring and correction
Berrian, D.W., R.E. Kaim and J.W. Vanderpot 518
Ion implanter automation for manufacturability: comparisons and recommendations
Enloe, D.T. 521
Scan compensation for Varian serial implanters
Fischer, P. 525

Automation features in the 160 XP high current implanter
Harada, M., C. Geary and R. Outcault 528
The Extrion 1000: a new high current ion implantation system for automated fabrication environments and intelligent process control
Liebert, R.B., A. Delforge, R. Hertel, H. Lulsdorf, E. Mears and S. Satoh 533
Dosimetry system characteristics which effect wafer uniformity
Lundquist, P. 538
Low dose implant performance monitoring of a medium current ion implanter
Simonton, R. and T. Breeden 543
New computer control system for the high current ion implanter PR-80
Sunouchi, T., M. Sasaki, S. Sato and M. Harada 548
Nonintrusive position measurement of magnetically scanned ion beams
Szajnowski, W.J. 552
Control of surface charging during high current ion implantation
Current, M.I., A. Bhattacharyya and M. Khidr 555
Ion beam induced wafer charging
Doherty, B.J. and D.J. McCarron 559
Analysis techniques of charging damage studied on three different high-current ion implanters
Felch, S.B., L.A. Larson, M.I. Current and D.W. Lindsey 563
In situ monitoring of wafer charging during ion implantation
Benveniste, V., H.E. Friedman, M.E. Mack and F. Sinclair 568
Wafer chargeup study on the PR-80 high current ion implantation machine
Nagai, N., T. Kawai, M. Naito, Y. Nishigami, H. Fujisawa and K. Nishikawa 572
Features of the ASM-220 end station
Pollock, J.D., R.W. Milgate, R.F. McRay and R.E. Kaim 576
A vacuum exchange end station for a new batch process ion implantation system
Hertel, R., A. Freytsis, E. Mears and A. Delforge 580
A flexible target chamber for a Varian 350 DF implanter
Kluge, A., H. Ryssel and R. Schork 584
Paperless datalogger: concept and realization for an implanter
Glawischnig, H. and R. Ploss 588
Production high-energy ion implanters with milliampere beam capabilities
Boisseau, P., A. Dart, A.S. Denholm, H.F. Glavish, B. Libby and G. Simcox 591
Precision Implant 9200 – An implantation system for 200 mm wafers
Fairbairn, K. 596
NV-6208: a midcurrent ion implanter with constant beam angle of incidence
Fleming, J.L., J.P. Dykstra, M.L. King, A.M. Ray and R.B. Simonton 601
A wafer charge-up-reducing system of a high-current ion implanter
Higuchi, T., M. Sato and T. Tamai 605
The development of a 400 keV ion accelerator for surface study and atomic collision experiments
Mihara, Y., T. Uchiyama, Y. Agawa, R. Fukui, T. Katagawa, O. Tsukakoshi, P. Rostek, H. Tsuboi, K. Takagi, H. Yamakawa, R. Kikuchi, A. Isoya and T. Koshikawa 609
Ion beam system for the new high current ion implantation system Extrion-1000
Satoh, S., T. Sakase, E. Evans and R.B. Liebert 612
Higher charge state ion beam purity in the Eaton medium current implanter
Simonton, R., M. King and D.E. Kamenitsa 616
Production implanter Nissin NH-20SR
Tamura, Y., M. Nogami, M. Tanaka, T. Maeda, H. Kumasaki and S. Tamura 620
Round-robin "ion-implanter and 4-point probes"
Glawischnig, H. and G. Lang 624
A comparison of wafer resistivity probing tools
Larson, L.A. 628

A concept for isotope separation in a sheet plasma by using ion cyclotron resonance heating
Noguchi, T., T. Tanikawa, K. Yamauchi, T. Nihei, H. Watanabe, K. Sunako and K. Takayama . 632

Production, characteristics and some applications of sheet plasmas
Sunako, K., K. Yamauchi, T. Noguchi, T. Nihei, H. Watanabe, T. Tanikawa, K. Takayama and T. Tsugueda 636

The NV-10SD high-current ion implantation system
Okada, K., T. Higuchi, T. Shiraishi, M. Sato and T. Tamai 640

Real-time, in-situ particle monitoring in a high current ion implantation production bay
Weisenberger, W., S. Chereckdjian, P. Borden and W. Knodle 644

A new 500 kV ion accelerator for ion-implantation and analyzing purposes
Koudijs, R. 649

Section VI. Applications for new materials and devices

Surface metallurgy with high energy heavy ion beams
Vasconcellos, M.A.Z., J.A.T. Borges da Costa, W.H. Schreiner and I.J.R. Baumvol 653

Formation of metal surface layers with high performance by ion implantation
Iwaki, M. 661

Surface modification of industrial components by ion implantation
Sioshansi, P. 667

Ion implantation in China
Zou Shichang and Liu Xianghuai 672

Ion beam processing of surgical materials
Williams, J.M., R.A. Buchanan and I.-S. Lee 676

Ion beam assisted deposition for metal finishing
Wolf, G.K., M. Barth and W. Ensinger 682

Effect of N_2^+ ion dose on the hardness and other properties of AlN thin films prepared by the dynamic mixing method
Takano, I., S. Isobe, M. Takemoto and T. Baba 688

Tribological properties of ion implanted SiC ceramics
Itoh, A., T. Hioki and J. Kawamoto 692

Growth mechanism and magnetic properties of AlMn metastable phase formed by ion beam mixing
Kido, Y. 696

Film formation of dititanium nitride by the dynamic mixing method
Kiuchi, M., K. Fujii, H. Miyamura, K. Kadono, M. Satou and F. Fujimoto 701

Effect of incident angles of N implantation on recrystallization of AlN_x thin films
Kobayashi, K., S. Namba, T. Fujihana, Y. Dai and M. Iwaki 704

Low energy ion implantation studies of polyacetylene films
Koshida, N., Y. Suzuki and T. Aoyama 708

Reflection electron energy loss spectroscopy of keV bombarded polystyrene at high ion fluences
Marletta, G., A. Licciardello, L. Calcagno and G. Foti 712

High energy implantation masking with polyimide
Mutikainen, R.H., H. Wong and N.W. Cheung 716

Electrical properties of polyimide films implanted with nitrogen and argon
Okada, T., S. Nishijima, K. Takahata, K. Katagiri, M. Kunori and K. Iwamoto 720

Friction and wear of nitrogen implanted aluminum alloy based FRM
Okada, T., T. Nishiura, K. Katagiri, S. Nishijima, K. Iwamoto, M. Kunori and A. Kobashi 724

Effects of ion irradiation on the optical properties of ZnSe–ZnS strained-layer superlattices
Sekoguchi, M., T. Taguchi and A. Hiraki 728

Studies of H_2^+ implantation into indium–tin oxide films
Serikawa, T. and S. Shirai 732

High dose implantation of bismuth ions into 3d transition metal films
Suezawa, Y., Y. Gondō, M. Doi and S.Z. Sun 735

Production of fast-switching power thyristors by proton irradiation
Kohno, I. 739

An ion implanted SOM pressure sensor
Xing Kunshan, Xu Xuemin, Chen Lizhi, Lin Chenglu, Tan Songsheng and Zou Shichang 741

Section VII. Emerging processes for VLSI and advanced materials

Critical problems of ion implantation in processing small geometry integrated devices
Tokuyama, T. 744

Feasibility of high-energy boron implantation for p-type retrograde well formation
Ohyu, K., T. Suzuki, T. Yamanaka and N. Natsuaki 749

Temperature problems with rapid thermal processing for VLSI applications
Kakoschke, R. 753

Rapid thermal processing, an integral part of shallow junction formation
Sedgwick, T.O. 760

Nonplanar and noncontinuous buried layers of SiO_2 in silicon formed by ion beam synthesis
Hemment, P.L.F., K.J. Reeson, A.K. Robinson, J.A. Kilner, R.J. Chater, C.D. Marsh, K.N. Christensen and J.R. Davis 766

ICB deposition of almost perfect large single crystal Al films on silicon substrate
Yamada, I. 770

High-intensity ionized cluster beams of large metal clusters
Gspann, J. 775

Development of an ionized cluster beam system for large-area deposition
Ina, T., Y. Minowa, N. Koshirakawa and K. Yamanishi 779

Silicon nitride and oxide film formation by the simultaneous use of a microwave ion source and an ICB system
Takaoka, G.H., K. Matsugatani, J. Ishikawa and T. Takagi 783

Review of ion-assisted deposition: research to production
Stelmack, L.A., C.T. Thurman and G.R. Thompson 787

Very-low-temperature thin-film formation technology by a low-kinetic-energy particle process
Ohmi, T. and T. Shibata 794

Deposition of wide-area diamond films in magneto-microwave plasma
Hiraki, A., H. Kawarada, K.-S. Mar, Y. Yokota, J. Wei and J.-I. Suzuki 799

Solid-phase recrystallization of Si-ion-implanted polycrystalline silicon films
Mizushima, I., K. Ohori and H. Kuwano 807

Characterization of Si^+-implanted GaAs substrates using thermal-wave measurement
Uchitomi, N., H. Mikami, K. Tomita and N. Toyoda 810

High-speed low-temperature film preparation by an ionized cluster beam, assisted by an ionized gas beam
Ito, H., Y. Minowa and T. Ina 814

The use of semiconductor processes for the design and characterization of a rapid thermal processor
Hodul, D. and S. Metha 818

Shallow junction formation by boron implantation with energies between 2 and 5 keV and rapid thermal annealing
Kakoschke, R. and K. Ehinger 823

Ion implant rapid thermal anneal international round robin
Yarling, C.B. and W.A. Keenan 828

Development of large scale ion beam milling machines
Arimatsu, K., I. Hashimoto, S. Ooishi, S. Tanaka, T. Sato and T. Gejyo 833

Development of a high deposition rate machine by ion beam sputtering
Hashimoto, I., K. Arimatsu, Y. Ishikawa, S. Tanaka and T. Gejyo 838

Glow plasma treatment at atmospheric pressure for surface modification and film deposition
Kanazawa, S., M. Kogoma, S. Okazaki and T. Moriwaki 842

Optimization of the ion-to-atom arrival rate for ion beam assisted Ge deposition
Masaki, S., M. Iwase and H. Morisaki 846

Ta_2O_5 film formation by double ion beam method
Ohnishi, T., Y. Yoshida, Y. Hirofuji and H. Iwasaki 850

ZnO crystal orientation change by bias voltage application to substrate or target in ion beam sputtering
Suzuki, Y., M. Yoshitake, T. Yotsuya, K. Takiguchi and S. Ogawa 854

New equipment for preparation of films by assisted deposition
Pan, X., X. Fan, F. Pan, M. Zhang and Z. Zhu 858

Growth of crystalline GaAs films on Si substrates by Ga and As ion beams
Tamura, S., M. Hyouzho, K. Yokota and S. Katayama 862

Low-energy double ion-beam deposition of compound films
Yoshida, Y., T. Ohnishi, Y. Hirofuji, H. Iwasaki and T. Ikeda 866

Atomic nitrogen generation system for reactive deposition of thin films
Sosnowski, M., M. Guzinski and R. Cornely 870

Deposition of thin films of copper on silicon substrates at low temperature by the ICB method
Sosnowski, M. and I. Yamada 874

Magneto-optical properties of $Cd_{1-x}Mn_xTe$ multilayered structures prepared by ionized-cluster beams
Koyanagi, T., T. Watanabe, K. Nakamura, K. Yamano and K. Matsubara 878

Grain boundary diffusion control of Cu films prepared by the ICB technique
Takaoka, G.H., K. Fujita, J. Ishikawa and T. Takagi 882

Size estimation of vaporized-metal clusters by electron microscope
Usui, H., M. Tanaka, I. Yamada and T. Takagi 886

Cutting of conductors on VLSI chips – a comparison between laser and focused ion beam removal
Yamaguchi, H., A. Shimase, S. Haraichi, M. Usami and T. Takahashi 891

Effect of ion bombardment on the structure of sputtered Ti–N films
Musil, J., V. Poulek, S. Kadlec, J. Vyskočil, V. Valvoda, R. Černý and R. Kužel Jr. 897

Computer studies of ionized cluster beam deposition
Yamamura, Y., I. Yamada and T. Takagi 902

Deceleration of ion beams for film deposition by an electrostatic field
Tabata, O., S. Kimura, M. Kishimoto, M. Takahashi, A. Nomura and S. Suzuki 906

Section VIII. Special topics

Ion implantation in high-T_c superconductors
Marwick, A.D. and G.J. Clark 910

Epitaxial growth of $YBa_2Cu_3O_7$ thin films and the influence of ion irradiation on the transport properties
Meyer, O., B. Egner, J. Geerk, R. Gerber, G. Linker, F. Weschenfelder, X.X. Xi and G.C. Xiong 917

Implantation, damage, and regrowth of high T_c superconductors
White, A.E., K.T. Short, J.P. Garno, J.M. Valles, R.C. Dynes, L.F. Schneemeyer, J. Waszczak, A.F.J. Levi, M. Anzlowar and K.W. Baldwin 923

Synthesis of superconducting Y–Ba–Cu–O thin films by ionized cluster beam codeposition
Yamanishi, K., S. Yasunaga, Y. Kawagoe, K. Sato and K. Imada 930

An MeV facility for materials research
Polman, A., A.M. Vredenberg, W.H. Urbanus, P.J. Van Deenen, H. Alberda, H. Krop, I. Attema, E. De Haas, H. Kersten, S. Doorn, J. Derks, J. Ter Beek, S. Roorda, R. Schreutelkamp, J.G. Bannenberg and F.W. Saris 935

Buried dopant and defect layers for device structures with high-energy ion implantation
Cheung, N.W., C.L. Liang, B.K. Liew, R.H. Mutikainen and H. Wong 941

Very high energy implants of boron into silicon
La Ferla, A., E. Rimini, G. Ciavola and G. Ferla 951

Epitaxial recrystallization and diffusion phenomena in amorphous silicon produced by MeV ion beams
Poate, J.M., F. Priolo, D.C. Jacobson, J.L. Batstone and M.O. Thompson 955
Improvement of CMOS latch-up immunity using a high energy implanted buried layer
Lin, H.-Y. and C.H. Ting 960
Effects of MeV ion bombardment and thermal annealing on $Ga_{1-x}In_xAs/GaAs$
Wie, C.R. 965
Electronic defects in silicon induced by MeV carbon and oxygen implantations
Wong, H., N.W. Cheung and S.S. Wong 970
Monte Carlo simulation of channeling effects in high energy (MeV) phosphorus ion implantation into crystalline silicon targets
Oura, K., T. Kojima, F. Shoji and T. Hanawa 975

Author Index 979
